## About me

I have been learning how to create web applications for over 2 years. My passion began with creating simple applications in an IT technical college, but the real learning began with the start of CodersCamp2020. So far, I have created two websites for the Rolnik Game Arena 2019-2020 e-sports tournament and one commercial application for the InoxBUD company. From the first job as a Junior Front-end Developer, I expect growth opportunities and continuous learning under the supervision of experienced industry specialists.On a daily basis I am interested in new technologies and artificial intelligence, and I spend my free time playing board games and Escape Rooms.
